**Deadline to Submit Proposed Changes  
to 2021 National Standard Plumbing Code (NSPC) is March 1**

**Ontario, Calif. (Feb. 14, 2019)** – In order to facilitate the development of an updated *National Standard Plumbing Code–Illustrated (NSPC)*, the IAPMO NSPC Committee requests proposed changes to the 2018 *NSPC*. All proposals are due by March 1. Proposals accepted by the technical committee will appear in the 2021 *National Standard Plumbing Code–Illustrated*.

The *National Standard Plumbing Code* uses an annual review process and publishes the complete code every three years. For a copy of the code change form with instructions or more information on the *National Standard Plumbing Code–Illustrated*, please visit [www.iapmo.org/nspc](http://www.iapmo.org/nspc).

All proposed changes must be submitted in electronic form to [nspc@iapmo.org](mailto:nspc@iapmo.org). If a standard is referenced, a copy of that standard must accompany the proposed code change that is submitted to the committee.

No proposals will be accepted after the 5 p.m. EST deadline on March 1.

IAPMO urges its members and other interested parties to get involved in the code development process. Designed to ensure the proper installation of plumbing systems, the *NSPC* provides local and state governments, code administrative bodies and the industry with a modern code to protect public health, safety and welfare.

“The *NSPC* is developed by all segments involved in the p-h-c industry: contractors, inspectors, manufacturers, engineers and labor,” said NSPC Chairman Frank Maddalon. “The *NSPC* has played a vital role as the state code for New Jersey and the testing code authority for Master Plumbers and Inspectors since 1977.”

For more information, please contact the IAPMO NSPC staff at [nspc@iapmo.org](mailto:nspc@iapmo.org).
