

What is IAPMO India?

The International Association of Plumbing and Mechanical Officials India (IAPMO India) has a strong cooperative presence throughout India. Through its collaboration with the Indian Plumbing Association (IPA), these two organizations work together to establish and advance a model code of plumbing designs, installation and maintenance known as the Uniform Plumbing Code – India (UPC-I) and to provide a framework for plumbing education and training based on the UPC-I.

IAPMO India maintains offices strategically located in Bengaluru and Pune to support the UPC-I, orchestrate educational offerings and facilitate conformity assessment services for plumbing product manufacturers throughout India. IAPMO India now offers plumbing product testing and certification services for India through collaboration with Intertek.

Founded in Los Angeles in 1926, The IAPMO Group has grown to be recognized in the world over for its *Uniform Codes*. With offices in 12 U.S. states and 13 countries, IAPMO has assisted with code development in such diverse places as Saudi Arabia, China, India, Jordan, Egypt, Israel, Vietnam, Indonesia, Philippines, Venezuela, Colombia, and the United Arab Emirates.

Product Testing and Certification to the Uniform Plumbing Code–India

India's Plumbing Code, the UPC-I

In 2008, the UPC-I was developed as the means to minimize risk by specifying technical standards of design, materials, workmanship and maintenance for plumbing systems. The 2008 UPC-I is now revised and updated considering the latest techniques and mandates. The 2011 UPC-I, jointly published by IAPMO India and IPA is available now. The specific aims of the code are:

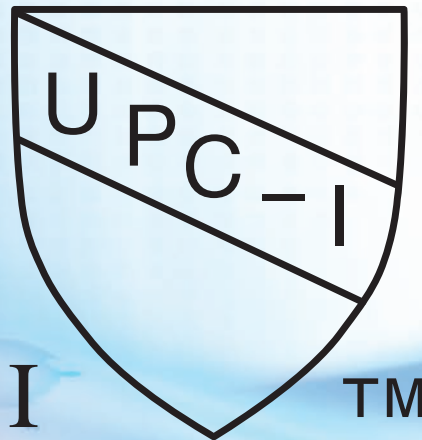

- Ensure that planners, administrators, designers and plumbers develop the required competency to ensure that the codes are applied and upheld
- Set standards to ensure that plumbing assemblies, materials and technologies are safe and effective
- Ensure that plumbing installations meet these standards uniformly throughout India
- Ensure safety and effectiveness continuously through the proper maintenance of these installations
- Conserve water and energy

Five Easy Steps to Certification

Since 1936, The IAPMO Group has certified plumbing, mechanical, solar and numerous other products, creating decades-strong value and instant recognition among Authorities Having Jurisdiction for their highly credible Marks of Conformity.

Certification through IAPMO India demonstrates a product's compliance with all of the codes and standards that govern its use within a specific jurisdiction.

The following are the five simple steps toward achieving product certification through IAPMO India:
