

*Prescott College Campus Commons
Prescott, AZ*

STRATEGY

First phase-passive, future phase-active. A master plan approach to the entire core campus took into account all existing and future hardscape surfaces to collect precipitation and deliver it to native & edible landscape beds which were graded as basins to receive the runoff making the passive collection the landscapes primary long term irrigation supply.

SPECIFICATIONS

- AVG. ANNUAL PRECIP. 13"
- HARDSCAPE CAPTURE: approx.. 7500 sf
- ACADEMIC BUILDINGS CAPTURE: 5000 sf (not yet utilized)
- STORAGES: Landscape soil, Future steel tanks
