*I do not now hold and I do not intend to hold any patent, the use of which would be required for compliance with this proposal.*

Signature of Applicant: \_\_\_\_\_ Date: \_\_\_\_\_

Please return this application to:

IAPMO  
Attn: Tricia Megee  
4755 E. Philadelphia Street  
Ontario, CA 91761-2816

For questions, call 909.472.4109. You may fax your completed application to 909.472.4157

**Deadline to submit application is October 1st of each calendar year.**

# Committee Descriptions

## Education & Training Committee

This committee plays an important role in helping IAPMO respond to the career growth needs of its members by developing strategies for activities and initiatives that will facilitate members' professional development and career advancement. Committee members make recommendations regarding new and innovative seminars, workshops, institutes, web-based learning, audio conferences, instructional materials, annual conferences and other educational events. This committee requires some level of familiarity with PowerPoint or Word as well as general computer literacy. This committee meets 1 to 2 times during the year, either in person and/or via teleconference.

## IAPMO Conference Education Program Planning Subcommittee

Each year, the education program at IAPMO's Annual Education and Business Conference is one of the focal points and highlights of the event. This subcommittee assists with the development of the conference education program in order to ensure that the sessions provided are timely, relevant, and high quality. The members of this subcommittee will assist IAPMO staff with identifying topics which are trending and important to the plumbing and mechanical industries as well as identifying and helping to secure potential presenters and speakers. These members may also be called upon to potentially assist in the development of education sessions and serve as a presenter if interested.

## Publication Development Committee

This committee plays an important role in helping IAPMO respond to the needs of its members for support products to assist them in the enforcement of the *Uniform Codes*, primarily the *UPC* and *UMC Study Guides* and the *Illustrated Training Manuals* for the *UPC* and *UMC*. The committee also evaluates existing products for currency and relevance and provides authorship of materials to be used in new products. This committee requires some level of familiarity with PowerPoint or Word as well as general computer literacy. This committee meets 1 to 2 times during the year, either in person and/or via teleconference.

## Product Certification Committee

The Product Certification Committee reviews applications for product certification and makes the certification decision based on test reports and supporting data provided by the applicant along with the recommendation of the Product Review Engineer. The committee considers not only the applicable product standard, but also relevant provisions of the applicable code. This committee meets 12 times per year in person. Due to the nature of the work performed by this committee, those employed in the manufacturing field may pose a conflict of interest.

## Professional Testing Subcommittee

IAPMO believes that the professionals that service our industry are fully competent to do their jobs in a way that ensures the health and safety of the public. A key component of that is professional certification and license testing. This subcommittee plays an important role by assisting in the development, quality control, and maintenance of IAPMO's certification and license testing exams. Committee members will assist in writing exam questions, examining exam challenges, verifying and developing exam outlines, and identifying areas in new code editions that need to be addressed in IAPMO's various exams.

## Standards Review Committee

The Standards Review Committee reviews and adopts all standards for use in product certification. The committee also works with the Standards Department to develop and approve IGCs (IAPMO Guide Criteria), which provide a path for certification of innovative products in the market for which no industry standard exists. This committee meets 12 times per year in person. Due to the nature of the work performed by this committee, those employed in the manufacturing field may pose a conflict of interest.

## UES - Evaluation Service Committee

The UES - Evaluation Service Committee (ESC) oversees the acceptance of IAPMO UES Evaluation Criteria (EC). New UES EC's go through a technical development process, public review and the resulting document is dispositioned by the (ESC). The EC meets either in person or by teleconference between 1 and 12 times a year as needed, but typically we convene quarterly. The qualifications for membership on the EC are either 5 years' experience in inspections or holding the position of Chief Building Official.

## UMC Answers & Analysis Committee

The *UMC Answers and Analysis* Committee is responsible for responding to technical questions on the provisions of the *Uniform Mechanical Code* as applied to specific situations. Questions may be directed to the committee through the Code Development staff. This committee requires some level of familiarity with PowerPoint or Word as well as general computer literacy. This committee meets 1 to 2 times during the year, either in person and/or via teleconference.

## UPC Answers & Analysis Committee

The *UPC Answers and Analysis* Committee is responsible for responding to technical questions on the provisions of the *Uniform Plumbing Code* as applied to specific situations. Questions may be directed to the committee through the Code Development staff. This committee requires some level of familiarity with PowerPoint or Word as well as general computer literacy. This committee meets 2 to 3 times during the year, both in person and via teleconference.

## Uniform Mechanical Code Workshop Committee

This Committee develops the program for the *Uniform Mechanical Code* Workshop conducted as a component of the educational sessions at the IAPMO Annual Conference. Committee members work throughout the year to craft the problems and solutions presented to participants during the training program. The Committee Chairman facilitates the workshop at the Conference. This committee requires some level of familiarity with PowerPoint or Word as well as general computer literacy. This committee meets 1 to 2 times during the year, either in person and/or via teleconference.

## Uniform Plumbing Code Workshop Committee

This Committee develops the program for the *Uniform Plumbing Code* Workshop conducted as a component of the educational sessions at the IAPMO Annual Conference. Committee members work throughout the year to craft the problems and solutions presented to participants during the training program. The Committee Chairman facilitates the workshop at the Conference. This committee requires some level of familiarity with PowerPoint or Word as well as general computer literacy. This committee meets 1 to 2 times during the year, either in person and/or via teleconference.
